Market Comment

The month of August witnessed some respite in Covid-19 tally as the smart lockdown measures yielded favorable results in big cities like Karachi. On the vaccination front, about 59mn doses have been administered by month end – roughly around 40mn citizens are partially vaccinated. NCOC aims to vaccinate around 70% of the population by year-end that, with rising awareness and enforced measures by Government, seems achievable.

Pakistan's Inflation as measured by CPI registered at 8.35% in August'21, compared to 8.21%YoY in August'20 on the back of rising food prices (10% YoY), Transport (8.1% YoY), Household Equipment (9.6% YoY) and Clothing & footwear (9.3% YoY). Average inflation for 2MFY22 arrives at 8.38%, above the government target of 8.2% for FY22. Key risks to this target include increase in international oil prices, surge in overall aggregate demand, and expected power and gas tariff hikes.

For the month of July'21, Current Account Deficit (CAD) clocked in at USD 773 mn compared to a surplus of USD 583 mn during the same period last year. Moreover, imports grew 41%YoY clocking in at USD 6.1bn, while exports grew 17%YoY to arrive at USD 2.7bn. The major contribution towards imports are medicinal products, crude petroleum and Liquefied Natural gas whereas the major growth in exports are in the textile sector mainly cotton yarn, cotton cloth and knitwear. Current Account balance has received strong support from workers remittances that have reached approximately USD 2.70 bn in July'21. SBP projects CAD to remain at 2-3% of GDP for FY22.

PKR depreciated during the month by 2.4% to close at PKR 166.39 mainly due to concerns from external front specially the trade deficit.

The Government announced provisional GDP growth number of 3.94% for FY2021. LSM Growth posted a whopping growth of 18.42% in the month of June, 2021. For FY21, LSM has depicted growth of 14.85% YoY led by 1) Automobiles 2) Non-metallic mineral 3) Chemicals 4) Coke & POL products and 5) Textiles.

In August KMI30 Index in USD was down by 1.1%. Performance in PKR was positive. The upbeat investor interest in Banks, Technology and Chemical sector supported the performance while weaker sentiments towards Cyclical especially Cements restricted index movement. Among top index points contributors were (i) Meezan Bank, (ii) System Limited, and (iii) Engro Polymer & Chemical whereas Lucky Cement was the main resistance to this support. Upcoming Pakistan Oil Refining policy, surge in Roshan digital account deposits, and slide of PKR against greenback remained focus point of news.

We maintain a positive stance Pakistan Equities in the medium to long term on the double – digit forward corporate earnings growth and attractive valuations compared to historical average as well as regional peers. At present, equities are trading at forward earnings multiple (PER) of 5.6x compared to Asia Pacific regional average of 15.4x and historical average of 8x while offering a dividend yield of 6.49% (Regional peers' average: 1.83%).

However, we prefer to be very selective in our stock picking and will be managing the portfolio actively.
