Investment Objective

The Fund is a US Dollar denominated, Shari'a compliant open-ended fund, that will invest in a diversified portfolio of Sukuk. The primary investment objective of the Fund is to achieve high income as well as capital growth. Certain share classes of the Fund will make income distribute on a quarterly basis, derived from income generated by the underlying Sukuk or maturity proceeds of Sukuk.

Monthly Commentary

August was broadly constructive for risk assets, with equities supported by resilient growth, AI-led investment and stable earnings, while fixed income markets remained volatile amid sticky inflation, higher oil prices and uncertainty around the Fed's policy path.

US Treasuries ended the month with a modest twist-flattening move, as 2-year yields rose 5bps, 10-year yields increased 1.5bps and 30-year yields declined 3bps, with hawkish Fed commentary and above-target inflation reinforcing expectations that policy would remain restrictive. Oil prices were supported by geopolitical risk, with Brent crude ending August near USD 90.5/bbl as limited progress in US-Iran negotiations and concerns around regional shipping routes sustained an energy risk premium.

Regional fixed income markets remained resilient despite higher US Treasury yields, with indices returning around 0.8%-0.9%, supported by spread compression, strong technical demand and healthy GCC sovereign fundamentals. Looking ahead, markets are likely to remain focused on US inflation, labor market data and the September FOMC meeting, with persistent inflation keeping the Fed cautious on any near-term easing signal.

ESG

At Emirates NBD Asset Management, we are committed to embedding environmental, social, and governance (ESG) principles throughout our investment process, aiming to foster sustainable, long-term value creation. Since becoming a signatory to the United Nations Principles for Responsible Investment (PRI) in 2021, we have continuously sought to implement global best practices in responsible investment and stewardship. ESG integration is central to our research and investment framework, empowering us to identify and mitigate risks while seeking new opportunities. We systemically evaluate material ESG factors alongside traditional financial metrics, incorporating insights from ESG analysis into investment recommendations to support long-term sustainable value for our clients. Our approach aligns with our fiduciary duty to deliver sustainable financial performance and contribute positively to the broader economy and society. We actively engage with issuers to promote responsible business practices and better alignment with both global and regional standards.

Our responsible investment practices are overseen by the Responsible Investment Committee, which guides the development and execution of our ESG policies, and monitors the investment teams' progress in ESG integration. This governance framework ensures that sustainability considerations are consistently embedded across all asset classes and investment activities.
